### FOLLOW US

# Having trouble choosing the right reliability product for you?

## We've done the dirty work

Empower your team and safeguard your operation with end-to-end delivery of world-class solutions.

# NB INDUSTRIES

## Why choose us?

### NICHE EXPERTISE

Our team possesses a depth of experience that few others can offer, installing, deploying, and supporting some of Australian mining's first autonomous fleets, FMS, and remote networks. We understand how equipment functions within the harsh Australian environment and can implement purpose-built solutions designed around each site's requirements.

### EXPERIENCED PEOPLE

With boots on the ground, our large and agile workforce, cross-technology resources, and unique industry knowledge, will help you implement the right solution for even the most complex projects.

### COLLABORATIVE ADVANTAGE

We have aligned ourselves with respected and progressive global brands, combining our resources and efforts to improve outcomes. Our partnerships with global specialists mean you receive world-class support and product solutions.

## Tailored for Success

Australia's rugged, dusty, and remote mining sites present unique challenges. To overcome these challenges, you need an experienced partner, and products designed with these challenges in mind.

We understand how equipment operates in Australia's mining conditions, the demand for reliability, and the critical need for safety. Our experience enables us to create bespoke solutions that meet the specific requirements of each site.

## Curated with Care

Every product has been tried and tested and proven its ability to advance efficiency, safety, and innovation in the mining sector.

**WE ARE INVESTED IN YOUR SUCCESS BECAUSE WE DON'T JUST SELL PRODUCTS— WE ALSO INSTALL AND SUPPORT THEM!**
